IDENTIFIERS	*University of Tennessee

ABSTRACT

All findings and tabulations from the 1974 survey, including a statement of methodology, are reported. This includes a crosstabulation of all results by age, sex, college, class level, and other variables. The data were collected from a representative sample of University of Tennessee at Knoxville students. Among the principal findings are: (1) students feel that the greatest problem on campus is attacks on women; other problems are venereal disease, getting money for education, and excessive drug use; (2) students are extremely favorable toward a variety of new ideas for campus improvement, but are strongly opposed to reinstatement of final exam week and to artificial turf on the athletic fields; (3) students are well aware of procedures for some academic matters and replacement of ID cards, but know very little about other important procedures; (4) students are extremely satisfied with "life in general" but mixed satisfactions are reported for specific matters, and unfamiliarity with some aspects of campus life was prevalent; (5) assessment of changes in student satisfaction between 1973 and 1974 show that overall, campus organizations and administrators ranked about the same, but slight increases in satisfaction were registered toward specific services and slight decreases toward the UT system and UT-Knoxville. (Author/MSE)

Final Report

1974 Campus Opinion Survey

Problems, Perplexities and Satisfactions of Students at UT-Knoxville

by
Jack B. Haskins, Director,
and
Bruce Cadotte, Research Assistant

October, 1974
Communications Research Center
College of Communications
University of Tennessee, Knoxville

Preface

This is the last of three reports on Campus Opinion Survey No. 2, conducted during the Winter Quarter, 1974, primarily to answer some questions raised by Chancellor Jack Reese, Vice Chancellor Howard Aldmon, and Professor Charles Cleland (the University Ombudsman).

The first report was merely a tabulation of the gross statistical results on the questionnaire, directed to the Chancellor's office.

The second report also covered the overall survey results plus some additional details and interpretation.

This, the final report, is a complete detailed report on all findings and tabulations from the survey, including a statement of methodology. An important added feature is a complete cross-tabulation of all results by age, sex, college, class level, and other variables. This enables the interested user to answer such questions as:

What kinds of people see X (e.g., venereal disease) as a major problem?
What kinds of people are in favor of (or opposed to) proposal X (e.g., giving official recognition to the Gay Liberation Movement)?
What are the characteristics of students who don't know procedure X (e.g., how to appeal unfair grades)?
What kinds of students are dissatisfied with university service X (e.g., Student Health Service)?

B. Complete questionnaire 118

C. Interview Verification Form 126

PART I. SUMMARY

Highlights of the Survey

This opinion survey, of a representative sample of UT-Knoxville students, delved into their views on the major campus problems, their reaction to new ideas and proposals, their knowledge of various procedures, and their satisfaction with life, government, and UT-Knoxville people and organizations.

Some of the principal findings were these:

(1) PROBLEMS: Far and away the greatest problem around campus is "rape and other attacks on women." Other major problems are venereal disease, getting money for education and excessive drug use. (Question 3 and 4 Tables)

(2) NEW IDEAS: Students are extremely favorable toward such things as bringing more distinguished speakers to campus, an information office for off-campus housing, the Public Interest Research Group (PIRG), a Black Cultural Center, allowing alcohol consumption on campus, and an all-campus parking lot on the Ag Campus. However, they are strongly opposed to a reinstatement of final exam week, and to artificial turf on the intramural athletic fields. (Question 5 Table)

(3) KNOWLEDGE OF PROCEDURES: Students are well aware of procedures for such things as "drop and add," deadline for dropping courses, curriculum and course advising, and replacement of ID cards. But on a number of other procedures there is considerable ignorance--reporting stolen athletic tickets, information on overseas study/travel/jobs, parking ticket appeals, guest athletic tickets, and appealing unfair grades. (Question 6 Table)

(4) SATISFACTIONS AND DISSATISFACTIONS: UT-Knoxville students are, on the whole, well satisfied with their life situation and with campus conditions and organizations. Extremely high satisfaction was noted on "life in general"

(including their standard of living, the future, their housing, and their education), and on specific campus services such as the libraries, computer registration, film programs, university bookstore, the Daily Beacon, intramural sports, and several other items.

The few extremely strong dissatisfactions included campus parking facilities, the quality of the Fort Sanders area, and the way the nation is being governed.

Satisfaction with "the way the UT-Knoxville campus is governed" is higher than for four other governed units (the UT system, the city of Knoxville, the state of Tennessee, and the nation).

Among four administrators, students were most satisfied with the job being done by Chancellor Jack Reese.

Unfamilarity--as indicated by a majority of students saying "no opinion"--was extremely prevalent for Student Counseling Center, Family Planning Service, Abortion Referral Service, International House, Vice Chancellor Howard Aldmon and Ombudsman Charles Cleland. (Question 1, 7, 8 Tables)

(5) CHANGES IN SATISFACTION, 1973 TO 1974. In the case of 13 of the "satisfaction" items, similar questions were asked in both the 1973 and 1974 Campus Opinion Surveys. Overall, the 13 UT-Knoxville organizations and administrators ranked about the same in both years (rank correlation between the two years, +.98). Slight improvements in rank were registered for the Daily Beacon and Student Health Service, slight decreases for the job being done by the UT-system and UT-Knoxville.

For more details on these and other findings of this comprehensive survey of student opinion, consult the remainder of this report.

"Question 1-8 Tables" which follow show gross results for each question.

"Tables 1-89" in the succeeding section give detailed cross-tabulations of each question by sex, class level, age, college, credit hours, marital status, and mode of transportation.

How This Study Was Conducted

This survey was performed during February-March, 1974, on a scientifically-chosen representative sample of UT-Knoxville day students.

This study was under the overall direction of Dr. Jack B. Haskins, with Bruce Cadotte, Research Assistant, supervising certain operations.

The questionnaire was developed on the basis of discussions with Chancellor Jack Reese, Vice Chancellor Howard Aldmon, Professor Charles Cleland, and other persons in the university administration. Four versions of the questionnaire were developed, pretested, and modified to arrive at the final questionnaire.

Interviewing was conducted by telephone where possible, with follow-ups by personal interviews. Interviewers made as many as five call-backs in order to reach members of the originally-drawn sample. No substitutions were allowed. Field work was directed by a professional interviewing supervisor, Mrs. Patsy Hodge. Interviewing was conducted by graduate and undergraduate students in the College of Communications, supplemented by two paid professional interviewers. Verfication interviews were conducted with about 10% of the sample.

The original random sample of 501 student names was scientifically chosen (by the equal interval from a random start method) from the winter quarter, 1974, student directory of 24,137 names. Intensive follow-up procedures with no substitutions allowed resulted in a completion rate of 75%. Thus, this report is based on a completed sample of 374 students.

The survey sample is almost perfectly representative of the entire UT-Knoxville student population on the characteristics of sex, and class standing, and major college. For example, 59% of both the sample and the population were male. Freshmen comprised 23% of the sample and 25% of the population. The appendix has more details.

PART II. MARGINAL TOTAL RESPONSES

This part contains (a) a narrative description of the findings in somewhat more detail than the highlights, plus (b) Question Tables 1-8 containing the marginal totals for all responses to each question.

Satisfaction with Life and Government

Students at UT-Knoxville say they're very satisfied with life in general, their standard of living, the future outlook, their housing, and the education they're getting. (Question 1 Table)

Considerably lower on their satisfaction scale, however, is the performance of five governmental units. Of those five, satisfaction was highest for the UT-Knoxville campus, followed by the UT-statewide system, the city of Knoxville, the state of Tennessee and lastly--the only source of strong dissatisfaction--the national government.

RANK ORDER OF SATISFACTION WITH LIFE SITUATION AND GOVERNMENT

Your life in general
Your standard of living
The way your future looks
Your housing situation
The education you're getting
The way the UT-Knoxville campus is being governed
The way the statewide University system is being governed
The way Knoxville is being governed
The way Tennessee is being governed
The way this nation is being governed

Question 1 Table shows the detailed responses. Tables 1-10 show cross-tabulations by age, sex and other variables.

Major Problems on Campus

Far and away the greatest problem on campus is "rape and other attacks on women." To a considerably lesser degree, other major problems are venereal disease, lack of money for education, and excessive drug use. (Question 4 Table). On 10 specific items mentioned by the interviewer, students responded as follows:

RANK ORDER OF PROBLEMS

Rape and other attacks on women
Venereal disease
Lack of money to finance college education
Excessive use of drugs by students
Excessive use of alcohol by students
Illegitimate pregnancies
Excessive sexual promiscuity
Excessive religious activity
Too many salesmen on campus
Pornographic films and books

Another approach to discovering major problems was an open-ended question, in which the interviewer asked simply "What do you think is the most important problem...?" The free verbatim responses were categorized as shown in Question 3 Table. Question 4 Table shows detailed responses. Tables 12-21 show cross-tabulations by age, sex and other variables.

Acceptance of New Ideas and Proposals

A number of new ideas and proposals for the UT-Knoxville campus were presented to determine the extent of favor or opposition. (Question 5 Table)

Students were strongly in favor of bringing more distinguished speakers onto campus, establishing an information office listing off-campus residences, establishing a Public Interest Research Group (PIRG), establishing a Black Cultural Center, allowing consumption of alcohol on campus, and building an Ag campus parking lot with shuttle-bus service.

However, strong opposition was voiced against the reinstatement of a final exam week and the installation of artificial turf on the intramural athletic fields.

On the 14 ideas so tested, the rank order of favorability was as follows:

RANK ORDER OF ACCEPTANCE OF IDEA, PROPOSAL OR INNOVATION

Bring more distinguished speakers to campus
Establish information office for off-campus residences

Establish Public Interest Research Group (PIRG)
Establish Black Cultural Center on campus
Allow drinking alcoholic beverages in campus housing
Build parking lot on Ag campus + shuttle-bus
Build high-rise parking garage on main campus
Allow unlimited guest visits in student dormitories
Close off Volunteer Blvd. for campus pedestrian mall
Permit more out-of-state students to enroll
Allow students to erase grades for any one quarter
Give official recognition to Gay Liberation Movement
Install artificial turf on intramural athletic fields
Reinstate final exam week at end of each quarter

Question 5 Table shows detailed responses. Tables 22-35 give cross-tabulations by age, sex, etc.

Knowledge of University Service Procedures

A modern university provides many services for its students. To what extent are UT-Knoxville students familiar with the procedures for getting things done, for their own benefit? (Question 6 Table)

More than three-fourths of the students say they know such things as how to drop and add a course, the deadline for dropping a course without penalty, where to get advice on planning courses and curriculum, and how to replace a lost or stolen identification card.

But on certain other procedures there is considerable ignorance. Two-thirds or more of the students don't know where to report stolen athletic tickets, where to get information on overseas study and travel and jobs, the time limit to appeal a parking ticket, and how to get guest athletic tickets.

On the 15 procedures mentioned, the rank order of knowledgability was as follows:

RANK ORDER OF KNOWLEDGE OF PROCEDURES

How to drop and add a course
The deadline for dropping a course without penalty
Where to get advice on planning courses & curriculum
How to replace lost/stolen ID & activities card
Where to go for financial help
Where to go for part-time jobs

Where to get advice on personal problems
Where to get counseling on post-college jobs & careers
How to arrange for late payment of registration fees
How to withdraw from UTK with least financial loss
How to appeal a grade you think unfair
How to get guest athletic tickets
The time limit to appeal a parking ticket
Where to get information on overseas study/travel/job
Where to report stolen athletic tickets

Question 6 Table shows detailed responses. Tables 36-50 provide cross-tabulations by age, sex, etc.

Satisfaction with UT-Knoxville People and Organizations

Opinions were asked on 28 specific items relating to the UT-Knoxville campus--administration, services and organizations. (Question 7 Table)

In general students appear to be well satisfied with these specific people and groups--a majority of students are satisfied on 15 of the 28 items, and strong dissatisfaction was noted for only one, the campus parking authority. The highest satisfaction ratings went to the university libraries, the computer registration system, the campus film programs, the university bookstore, the intramural sports office, and the Daily Beacon.

Among four administrators, satisfaction was highest for Chancellor Jack Reese.

Unfamiliarity--as indicated by a significant proportion saying "no opinion"--was a pertinent factor in many cases such as the Student Counseling Center, the Family Planning Service, the Abortion Referral Service, International House, President Edward Boling, Vice-Chancellor Howard Aldmon, and Ombudsman Charles Cleland.

RANK ORDER OF SATISFACTION WITH UT-KNOXVILLE PEOPLE AND ORGANIZATIONS

The University Libraries
The computer registration system
The campus film programs

The University Bookstore
The Intramural Sports Office
The Daily Beacon newspaper
The Rape Crisis Center
Chancellor Jack Reese
The Free University
The campus security police
The Intercollegiate Athletic Department
The Student Health Service
The Campus Entertainment Board
The Student Affairs Office
The abortion referral service
The Greek-letter fraternities and sororities
The Student Counseling Center
The family planning service
The Ombudsman Charles Cleland
The Women's Intercollegiate Athletic program
International House
The head of student affairs Howard Aldmon
The University Food Services
The student judicial system
The UT-system President Edward Boling
Director and staff of Residence Halls Office
The student government system (Student Senate)
The campus parking authority

Question 7 Table shows detailed responses. Tables 51-78 give cross-tabulations by age, sex, etc.

Changes in Satisfaction from 1973-1974

Similar questions about satisfaction with 13 different people and organications were asked in both the 1973 (May) and 1974 (March) Campus Opinion Surveys.

As shown in the table below, the rank order of these 13 items was almost identical in the two years (as shown by a rank-correlation coefficient of +.98).

The only significant changes in rank were (a) increases in satisfaction with the Daily Beacon and the Student Health Service, and (b) decreases with the UT-system and UT-Knoxville operations.

Satisfaction Rankings, 1973-74

	May 1973 rank[1]	March 1974 rank[2]	Change
Chancellor (Dykes/Reese)	1	2	-1
UT-Knoxville government	2	6	-4
Registration procedures	3	1	+2
UT-system government	4	7	-3
Campus security police	5	5	0
Daily Beacon newspaper	6	3	+3
Student Health Service	7	4	+3
University housing	8	9	-1
Food service	9	8	+1
President Boling	10	10	0
Tennessee state government	11	13	-2
UTK Student government	12	12	0
Knoxville city government	13	11	+2

(Rank-correlation coefficient, 1973:1974--+.978)

[1] The May, 1973, Campus Opinion Survey data are based on a question in which items were rated as "Above average, average, or below average" (Rank based on Above average/below average index)

[2] The Winter, 1974, data are based on a question in which items were rated for "satisfied or dissatisfied with the job being done" (Rank based on Satisfied/Dissatisfied index).

The fact that the rankings are so similar on two different occasions is strong support for the reliability of the research procedures employed.

Satisfaction with General Conditions Around Campus

Opinions were requested on 11 general conditions around campus not linked to specific people or organizations. (Question 8 Table)

Highest satisfaction was noted for the treatment of women students, the quality of student campus housing, the treatment of foreign students, and the opportunity to take part in Student Government.

Great dissatisfaction was voiced for campus parking facilities, and housing quality in the Fort Sanders area.

RANK ORDER OF SATISFACTION WITH GENERAL CONDITIONS AROUND CAMPUS

Treatment of women students
Quality of student campus housing
Treatment of foreign students
Opportunity to take part in student government
Treatment of black students
Availability of faculty & staff when you need them
Opportunity to take part in government for UT-Knoxville
Adequacy of information on university procedures & policies
Opportunity to take part in government of statewide UT system
Quality of housing in Ft. Sanders area
Parking facilities on campus

Question 8 Table gives the detailed responses. Tables 79-89 show cross-tabulations by age, sex, and other variables.

Question 1 Table

(1) In the lives of each of us, there are usually some things we're satisfied with and some we're dissatisfied with. On the whole, would you say that you are satisfied or dissatisfied with.......

	Per cent responding			
	Satisfied	Not satisfied	No Opinion	Other
(a) Your life in general?	93.9	6.1	0	0
(b) Your housing situation?	85.0	14.2	0.3	0.5
(c) Your standard of living?	87.2	12.3	0.3	0.3
(d) The way your future looks?	83.4	12.0	4.5	0
(e) The education you're getting?	83.7	15.0	0.8	0.5
(f) The way this nation is being governed?	21.1	71.9	6.1	0.8
(g) The way Tennessee is being governed?	45.5	36.1	17.6	0.8
(h) The way Knoxville is being governed?	40.1	29.1	30.5	0.3
(i) The way the statewide University system is being governed?	56.1	27.0	16.0	0.8
(j) The way the UT-Knoxville campus is being governed?	65.0	25.9	8.0	1.1

Mean no. of "satisfied" responses: 6.61 per student

Question 2 Table

(2) Taking everything into account, how happy would you say you are--VERY happy, FAIRLY happy, or NOT happy?

Very happy	40.0%
Fairly happy	57.3%
Not happy	2.2%
Don't know	0.0%
Other	0.5%

Question 3 Table

(3) There are always some problems on any university campus that are felt by students to need action and solution. What do you think is the most important problem facing students at UT-Knoxville these days?

	CATEGORY* OF "MOST IMPORTANT PROBLEM"	Free response percentage
(28)	Non-academic miscellaneous	14.2
(23)	Auto use/parking	12.5
(26)	Personal	12.3
(17)	Academic - miscellaneous	10.9
(27)	"Powerlessness" and apathy	10.1
(22)	Contracts (food and housing)	6.0
(12)	Instruction (courses, grades, exams, etc.)	7.9
(16)	"Irrelevant education for future"	5.7
(21)	Finances	4.1
(14)	Academic requirements	1.4
(11)	Admission and registration	1.1
(25)	University services	1.1
(30)	No problems	12.8

*(Categories developed by Dr. Charles Cleland--see Appendix)

Question 4 Table

(4) A number of things have been mentioned lately as possible problems for students here at UT-Knoxville. As I name some of these specific things, please tell me if you consider it a major problem. By a major problem, I mean anything that either has a serious effect on some students or adversely affects a large number of students. In your opinion, at this university is there a major problem, a minor problem, or no problem with.......

	Per cent responding				
	Major problem	Minor problem	No problem	No opinion	Other
(a) Students' lack of money to finance their college education?	29.9	59.9	5.9	3.7	0.5
(b) Too many salesmen on campus?	7.2	42.2	42.8	7.2	0.5
(c) Rape and other attacks on women?	70.1	26.5	2.4	0.5	0.5
(d) Excessive religious activity?	10.2	44.1	42.5	2.7	0.5
(e) Excessive use of alcohol by students?	16.8	43.6	36.1	2.9	0.5
(f) Excessive use of drugs by students?	28.9	48.9	17.6	4.0	0.5
(g) Excessive sexual promiscuity?	11.0	47.1	36.6	4.5	0.8
(h) Venereal disease?	36.6	40.6	10.4	11.0	1.3
(i) Pornographic films and books?	6.7	43.3	43.9	5.6	0.5
(j) Illegitimate pregnancies	15.4	49.1	24.3	10.2	1.1

Mean no. of "Major Problems": 2.28 per student

Question 5 Table

(5) Several new ideas and proposals have been presented to the university administration lately. As I mention each one, please tell me if you favor or oppose the ideas. Would you favor, or oppose an action by the university administration to.......

	Per cent responding				
	Favor	Neutral	Oppose	Don't know	Other
(a)...build a high-rise student parking garage on the main campus?	73.5	1.9	23.8	0.8	0
(b)...close off part of Volunteer Blvd. for a campus pedestrian mall?	69.0	3.2	25.4	2.4	0
(c)...establish a Public Interest Research Group to protect students?	85.3	2.1	9.6	2.4	0.5
(d)...reinstate a final examination week at the end of each quarter?	24.6	2.9	69.3	2.9	0.3
(e)...allow students to erase from the record the grades for any one quarter?	58.0	2.4	38.0	1.6	0
(f)...permit more out-of-state students to enroll here than the present 15%?	62.0	2.4	31.8	2.7	1.1
(g)...build a large parking lot on the Ag. campus, along with fast cheap shuttle bus service all over the campuses?	77.5	1.3	18.4	2.4	0.3
(h)...bring more distinguished speakers from elsewhere to speak on campus?	90.9	2.4	5.1	1.1	0.5
(i)...establish a Black Cultural Center on campus?	75.7	4.8	15.8	3.5	0.3
(j)...establish an information office for listing off-campus residences?	89.3	0.5	9.1	1.1	0
(k)...allow the drinking of alcoholic beverages in campus housing?	78.1	1.6	18.7	1.1	0.5
(l)...give official recognition to the Gay Liberation Movement?	46.8	4.5	44.7	4.0	0
(m)...install artificial turf on the intramural athletic fields?	36.1	4.8	54.8	4.3	0
(n)...allow unlimited guest visiting privileges in student dormitories?	71.9	2.7	23.0	1.9	0.5

Mean no. of "Favor" responses: 9.4 per student

Question 6 Table

(6) Students sometimes say they're not too clear on university procedures for getting certain things done. As I name several kinds of things, please tell me if you yourself feel that you know the correct procedure. This is not a test--just tell me if you think you know the procedure. Do you feel that you know....

	Per cent responding			
	Yes	Not sure	No	Other
(a)...how to drop and add a course?	97.1	1.1	1.6	0.3
(b)...the deadline for dropping a course without penalty?	91.7	1.3	6.7	0.3
(c)...how to appeal a grade you think unfair?	33.0	7.5	59.5	0
(d)...where to get advice on personal problems?	57.9	2.9	38.9	0.3
(e)...how to get guest athletic tickets?	31.9	2.1	66.0	0

Mean no. of "Satisfied" responses: 5.20 per student

Personal Characteristics Tables (P1-P9)

(P1) What is your present academic class level as a student?

Freshman	22.7%	Sophomore	20.3%	Junior	17.4%	Senior	20.9%
Master's	9.6%	Doctoral	4.5%	Other	4.5%		

(P2) What is your major, or intended major subject at UT?

Not Tabulated

(P3) In what college or school of the university is your major subject located?

Agriculture	6.7	Engineering	8.7	Liberal Arts	30.0
Architecture	3.5	Evening College	0.3	Library Science	0.3
Business Ad	20.5	Health-Physed-Rec.	0.5	Planning	0.3
Communications	3.4	Home Economics	4.6	Other	4.1
Education	17.3	Law	0.8		

(P4) How many credit-hours are you enrolled for this quarter?

Part-time (Zero to eight hours)	13.9
Full-time (nine or more hours)	86.8

(P5) What is your age?

Under 18	6.1
18-21	55.2
22-25	22.8
26-29	8.3
30 & over	7.5

(P6) Are you married or single?

Married	22.2
Single	77.8

(P7) How do you generally get to campus--by car or walk or what?

Car	43.7	Walk	49.3	Bicycle	0.8	Bus	4.3	Other	1.9

(P8) (Sex of Respondent)

Male	59.1
Female	40.9

(P9) This final question is optional. What is your race?

White	95.7	Black	2.4	Other	1.9

PART III. CROSS-TABULATION TABLES 1-89

This is a complete cross-tabulation of all structured responses by age, sex, class level, college, part- or full-time status, marital status, mode of transportation, and accessibility. These tables can help identify the kinds of people associated with certain important responses.

For example, Question 1j determined that 25.9% of students are dissatisfied with the UT-Knoxville campus government. What kinds of students are most dissatisfied? A look at Table 10 shows that the most dissatisfied students tend to be: seniors (37.2%), students aged 22-25 (36.5%), in the College of Liberal Arts (39.6%). Tending to have "no opinion" are graduate and professional students (18.6%) aged 30 and over (21.4%). The most satisfied groups tend to be freshmen, students under 18, and students in Agriculture.

Or take Question 4a, which shows that about 30% of students on campus say that finances are a major problem. This tends to affect females slightly more than males, but otherwise there are no noticeable differences among different kinds of students.

Question 5e deals with favor or opposition to the idea of an "academic bankruptcy" quarter. This is generally opposed by 38% of students. Heaviest opposition comes from graduate and professional students (60%), students aged 26-29 (61.3%), part-time students (50%), and married students (47%).

A similar analysis can be applied to all of the 89 tables in the cross-tabulation section. It is possible to identify those giving what are considered "favorable" responses, or "unfavorable" responses. An important group are those persons representing the "don't know" or "no opinion" responses; these responses reflecting unawareness, ignorance or apathy represent a challenging group for whom specific information campaigns might be devised. For example, question 6d reveals that 44.4% of students have "no opinion" about the Student Affairs office's performance. The very young (under 18) and the oldest (30 and over) are most likely to have no opinion, along with part-time and married students.

Due to small sample sizes in some sub-groups, a difference of at least 8-10% from the general population should be obtained before any subgroup is considered to be significantly different.

*Table 1 : SATISFACTION WITH LIFE IN GENERAL

APPENDIX A. METHODOLOGY

Population. The population for this survey was designated as "all day and evening students enrolled at UT-Knoxville." Those living outside of Knox County were included in the sample; however, in the closing days of the field work, those living outside Knox County, i.e., those who had to be reached by long distance telephone, received last priority for follow-up (see "interviewing procedure" below).

Sample selection and size. The Student Statistics office of the University furnished an alphabetized list of all day and evening students enrolled at UTK during the Winter Quarter, 1974. This list provides the name, local address, and local telephone number (among other data) for the 24,137 students enrolled during the quarter in question.

A sample size of 500 was decided upon as adequate (yielding a sampling error of 2.2% where p=50%).

This results in a sampling interval, from the list, of every 48th name (24,137/500=48.3) from a random starting position between 1 and 48. This procedure provided 501 student names. Of these, 49 did not have a listed telephone number. (Follow-up through telephone information sources or personal interview enables 16 of these to be included in the sample.)

Completion rate and sample quality. Of the 501 originally-drawn designated respondents, interviews were obtained with 374, a completion rate of 74.6 per cent. With available resources of time and personnel, this rate compares favorably with an optimum expected completion rate of 80 per cent. The sample attrition is due primarily to 1) refusals, 2) generally unavailable respondents, and 3) designated respondents who had moved without leaving forwarding addresses or phone numbers. The time available for interviewing did not permit further follow-up which quite likely would have brought more respondents into the final sample.

Table 1 shows how the sample of 374 students compares with the UTK student body with respect to class standing and sex. The distribution of the sample did not differ significantly from the UTK student population characteristics as obtained from the University's Winter Quarter, 1974 Enrollment Summary.

SAMPLE QUALITY

	% of sample	% UTK Pop.*	X^2 (probability)
Male	59.1	59.01	$< .001$ ($p > .95$)
Female	40.9	40.99	
	100.0	100.00	
Freshman	22.7	25.32	
Sophomore	20.3	18.00	
Junior	17.4	16.22	3.74 ($p > .30$)
Senior	20.9	19.49	df = 4
Graduate and Professional	18.7	20.97	
	100.0	100.00	

*Numbers indicate proportion of all UTK students who fall into exactly these categories according to the enrollment Summary. Other characteristics of the sample are shown in Part II.

A sample of the size attained in this study (374) has a sampling error (irrespective of other sources of error) of about 2.6% on a response proportion (p.) of 50%. This error becomes somewhat smaller on larger or smaller proportions down to about 1.7% for proportions of 10% or 90%.

Questionnaire. The basic format for the questionnaire arose from a pilot study (Campus Opinion Survey #1) done in Spring Quarter, 1973. The questionnaire was designed to be easily coded and to enable keypunching of the data directly from the questionnaire forms by the UT Computing Center. The entire questionnaire is displayed in Appendix C. Question items for this study arose from two basic sources: (a) a continuation of topics raised in Campus Opinion

Survey #1 and (b) discussions with Jack D. Reese, Chancellor of The University of Tennessee-Knoxville, Vice Chancellor Howard Aldmon and Ombudsman Charles Cleland. These discussions centered on items of current interest at UTK about which knowledge of student opinion would be helpful to the administrative decision-making process.

The questionnaire went through several pretesting and modification stages. Trial telephone interviews were then carried out on each draft by a professional interviewer under field conditions and subsequent revisions were made. The questionnaire was arranged to be suitable for both telephone and personal interviewing.

Despite the apparent length of the questionnaire, interview time was well within reasonable limits. For 370 questionnaires for which the information was available, the mean interview time was 15.3 minutes (minimum, eight minutes; maximum, 52 minutes; standard deviation, 4.48 minutes). Respondents did not complain about the length of the interview.

One question (number three) required a free-response answer. Insofar as it was possible, the replies to this question--which asked the respondent what he thought was the most important problem facing UT students--were coded in accordance with categories of student complaints established by the University's ombudsman, Dr. Charles Cleland. This categorization of responses is not satisfactory for purposes other than comparison of respondents' opinions with the ombudsman's records, but the questionnaires have been saved in case other investigators are interested in the verbatim replies.

Interviewers. Interviewers used in this study were of two kinds: 1) students enrolled in two research courses in the College of Communications (Journalism 4990 and Communications 5120)--student participation in this study was a course requirement--and 2) two paid professional interviewers and an interviewer-supervisor.

Students were also involved in other phases of the survey.

The interviewer-supervisor conducted briefing sessions for the students and the paid interviewers prior to the field work; she also conducted interviews herself, specializing in hard-to-reach respondents and/or the few respondents who refused on initial interview attempts.

Student interviewers turned all incomplete questionnaires in between a week and ten days after the start of actual interviewing; the paid interviewers performed all subsequent interviewing. This method seemed to work well as the pilot study done in Spring 1973 had suggested it would. Students were initially assigned approximately 25 interviews each. Without relief from professional help this number of interviews would have been a considerable burden.

Interviewing procedure. When the sample was drawn, the names, addresses, and telephone numbers of the designated respondents were written on questionnaire forms, along with a numerical identification.

While this task was being done, the student interviewers were being briefed in the use of the questionnaire and were instructed to practice the interview on three names drawn from the student directory (alphabetically adjacent to their own names). One member of the drawn-sample was caught by this "practice" procedure. Final questions about classifiying responses and general interviewing practice were being answered.

Time did not permit complete randomization of the respondents before assigning them to the student interviewers. The respondent list (alphabetically arranged) was divided into quarters, however, and interviewers received roughly equal proportions of respondents from each segment of the alphabet.

Before assignment to interviewers, respondents who lived outside of Knox County were removed from the list and these names were assigned to two "long-distance specialists" who had access to the University's WATS line. The other interviewers were instructed to turn over their long-distance calls (which had escaped the first purging of the list) to the project director who then reassigned these long-distance respondents to one of the specialists.

Interviewers were instructed to make as many callbacks as necessary (and possible within the allotted time) to reach the respondent. Table 2 shows how the sample was finally distributed with respect to the number of dialings or other attempts needed to reach the respondents.

NUMBER OF INTERVIEW ATTEMPTS NEEDED TO
REACH INTERVIEWED SAMPLE

	N	% of sample
One or Two dialings	186	49.7
Three to Five dialings	113	30.2
More than five dialings and/ or personal interview	75	20.1
	374	100.0

Four-fifths of the final sample were reached with five or fewer dialings.

The typical student interviewer completed interviews with about half of his 25 assigned respondents in the seven to ten days in which he was required to participate. The remainder were obtained by the paid (non-student professional) interviewers. It is possible, therefore, that the harder-to-reach respondents were interviewed in a slightly different fashion from the easier-to-reach ones. This must be remembered when the differences between easy and hard-to-reach respondents are considered elsewhere in this report.

Interviewers were told to do their interviewing by telephone. The paid interviewers were allowed to attempt personal interviews when the respondent was (a) unreachable by telephone or (b) apparently had no telephone. Personal interviewing was a last resort because of the unpredictable schedules of the student respondents and the expense of personal interviewing.

Although interviewers were provided with credentials as College of Communications interviewers, the credentials were not needed.

As in the pilot study, the primary question was to be repeated if needed during the lengthy structured questions used in this survey to maintain tempo and respondent orientation. Interviewers, as noted on the questionnaire, were asked to write down verbatim the first problem, and only the first problem, mentioned by the respondent on question 3. They were instructed to probe if the first answer was unclear, vague, or ambiguous. Although most replies appear to be adequately recorded, there are indications that student interviewers would benefit from supervised practice in recording and probing open-end questions.

Interviews were verified by having every tenth respondent answer a short additional questionnaire at a later date. These reinterviews were conducted by two student interviewers who did not know the identity of the original interviewer. No instances of interviewer cheating were found.

Toward the end of the quarter, long-distance respondents were given last priority for follow-up, for several reasons. First, out-of-town respondents were typically very difficult to reach; second, the problems of access to the University WATS line made repeated callbacks burdensome (and in many cases all but impossible); and third, the opinions of students living in or near Knoxville were judged to be more important than those of students who had little to do with UTK (one respondent had not been on the UTK campus in 20 years). The nature and amount of the bias introduced from this source is unknown; however, it should be said that every feasible effort was made to include the opinions of all members of the drawn sample in this survey.

It bears repeating that a high proportion of students (90.2%) have telephones, interviews were not overly long, and that most of the material in the questionnaire was of high interest to the respondents. Therefore the use of telephone interviewing proved appropriate.

Survey timetable.

January -- Questionnaire design, survey planning, a questionnaire pre-testing.

Feb. 1-12 -- materials preparation (credentials, instructions, etc.)

Feb. 8 & 11 sample drawn.

Feb. 13 -- first interviewer briefing, trial questionnaires handed out

Feb. 14 -- interviewer kits assembled.

Feb. 15 -- interviewer debriefing final interviewer briefing, kits handed out, field work begins.

Feb. 26 -- student interviewing completed, professional interviewing under way, verification begins.

Mar. 8 -- interviewing ends, coding begins.

Mar. 28 -- coding ends.
